Dieting has become a great fad in America, and just as, years ago, we, as a nation, over-ate, so now we are undereating. The one is as bad as the other. Man needs food and plenty of it to sustain life and to give strength to compete in this busy world.

It is not, however, the fact that you may eat too much that hurts you, but that you don't digest what you eat. And if that results in dyspepsis you will not cure the trouble by cutting down your food supply. If your digestive organs were creating the proper amount of gastric and peptic julces you would have no dyspepsia. To cure the disease you must create an abundance of these necessary julces.
